

Breakdown Sheet

The "Urmel voll in Fahrt" shots are copyright by Constantin Film. I was responsible for the animation of all characters in all the shots. The animation was done using Maya 8.5.

Apart from that, I am responsible for everything else shown in the following work, with the exception of the Bishop character rig. This rig was created and supplied by Animationmentor.com. The software used for all these other shots was Alias Maya 7.

The same is true for the shortfilm "What I want to be" which was created entirely by myself, with the exception of the above mentioned Bishop rig. Again, Maya 7 was used.
